PROJECTS

- **Smart Cactus Care System**

Built an Arduino-based smart plant monitoring and automatic watering system using RemoteXY. Monitors environmental conditions and controls watering with real-time alerts and LCD display.

Tech Stack: Arduino Uno, Embedded C, Arduino IDE, Sensors, LCD Display, Relay Module, Basic Circuit Design

- **Diabetes Prediction Using Support Vector Machine**

Developed an SVM-based machine learning model to classify diabetes using preprocessed clinical data. Evaluated performance with accuracy, precision, recall, F1-score, and confusion matrix.

Tech Stack: Python, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn

- **Java Desktop Calculator Application**

Developed a Java Swing desktop calculator with a GUI for basic arithmetic operations using event-driven programming and object-oriented principles.

Tech Stack: Java, Java Swing, Object-Oriented Programming (OOP), GUI Development, Exception Handling, Java IDE

EXTRA-CURRICULAR ACTIVITIES

- Webmaster of WIE, University of Sri Jayewardenepura (2024/25)
